### Preface

vii

## I Uses and Limitations of the Tempera

I

Tempera painting a strict discipline—Tendencies in modern painting—The media of the future—The limitations of tempera painting—Normal scale—Factors in naturalistic painting—A critical approach

## II Carriers and Grounds

8

Properties of wood—Effects of humidity—Selection and conditioning of woods—Casein glue for joining—Precautions against warping—Plywoods—Wood pulp boards—Paper—Metals—Canvas—Walls—Preparation of panels—Materials—The standard size solution—Sizing the panel—Applying moldings and ornaments—The second sizing—The *intelaggio*—Puttying—The simplest gesso—The secret of success—Application of the gesso—An alternative method—Scraping the gesso—How to test the scraping—Stoning down a flat—Qualities of good gesso—*Pastiglia*—Gessoing frames—Cennino's gesso—Parchment size—Gesso grosso—Gesso sottile—Mixing the thin gesso—The perfection of the method

## III Methods of Drawing

40

Designing for tempera—Preliminary studies—Form drawing—Tinted papers—Drawing instruments—Brush drawing—Modeling up the lights—Transferring the cartoon—Drawing on the panel—Importance of the monochrome rendering—Incising the outlines

## IV Applications of Metals

51

Metals in the design—Bole for gilding—Mixing and applying the bole—How much to put on—Polishing the bole—Gilding with glair—Tools for gilding—The gilder's cushion—The knife—The gilder's tip—Substitutes—Qualities of gold leaf—Handling the leaf—The use of the knife and cushion—Cutting the leaf—The use of the tip—Laying the gold—The order of gilding—Faulting—Burnishing—Varieties of burnisher—Stamping and graining—Punch cutting—Graining *pastiglia*—Patterns in color and gold—"Combination Gold and Silver Leafing"

## V Pigments and Brushes

74

Function of pigments—Natural and artificial colors—The colored earths—Individual pigment characters—Experimentation—Palettes

for tempera—Whites—Blacks—Yellows—Reds—Browns—Blues—Greens—Transparent pigments—Shell gold—The choice of a palette—Grinding the colors—Storing the ground colors for use—Dishes for mixing—The choice of brushes—Sables—Bristles—Care of brushes

## VI Painting

96

Mixing the tempera—Preservatives—Tempering the colors—Reserves of color—Liquidity of the mixtures—Handling the color—Basic principles of tempera painting—Control of form—The function of the monochrome drawing—The order of painting—A hypothetical case—Mixing values—Applying the tones—Glazing over the scumble—Tempera *vs.* gouache and water color—Painting drapery and other objects—Development of the forms—Systematic value mixing essential—Variations of color system—Treatment of surface effects—Painting flesh—Painting hair—Variations of method—Final embellishments—Water mordants—Oil mordants—Applying the mordant—Gilding

## VII Varnishing and Framing

120

Permanence of tempera painting—Importance of varnishing—Cleaning the surface—Precautions against dust and damp—Choice and care of the varnish brush—Applying the varnish—Flatting the surface—Function of a frame—Matte gilding—Water matte—Oil matte—Skewing down—Frame edges—Antiquing—Other frame materials

## VIII Artificial Emulsion Painting

129

Unlimited possibilities—A basic formula—Casein emulsions—Underpainting for oil—Preparation of wall surfaces

## Appendix

132

"Tempera Practice in the Yale Art School," by Professor Lewis E. York
